

Iowa does not have a do-not-call list so I strongly support implementing a national do-not-call list. Telemarketer needs more controls placed on them. An example of their invasive behavior occurred to me on Sunday, November 11, 2002. I received numerous calls from a telemarketer for Crane Products. She called at least 6 times between 10:00-10:30 am. I finally stopped answering the phone so she began leaving abusive messages such as: "I know you are there and you are very rude to not answer your phone." - "You better answer the phone because I know you are there." - "You were very rude to hang up on me." Please implement a national do-not-call list and enforce it. Do not put the burden on consumers to pay for the extra phone services that are needed if we want to screen out telemarketers' calls.
